AV Jet MSDS

#### PHYSICAL AND CHEMICAL PROPERTIES

Boiling Range 760 mmHg: 320°F-554°F Vapor Pressure mmHG 068°F: 5 Solubility in H20%: Insoluble Specific Gravity, H20=1: 0.8 % Volatile by Volume: 100 Viscosity (method, temp): N.A.

Viscosity (method, temp): N.A.
Appearance: Water clear to colorless liquid

Melting Point: N.A. Vapor Density (air=1): 5

ph: N.A.

Evaporation Rate: 0.04

(ether=1)

Odor: Mild petroleum odor

### FIRE AND EXPLOSION DATA

Flash Point: 120°F

Flammable Limits in Air & by Vol. Lower: 0.7 Upper: 5.0

Autoignition Temperature: 450°F

Extinguishing Media: Dry chemical, foam, or carbon dioxide.

Special Fire Fighting Procedure: Use water spray to cool exposed containers.

Use a smothering technique for extinguishing fire of this material. Do not use a forced water stream directly on petroleum fires as this will scatter the fire.

Firefighters should wear self-contained breathing apparatus and full protective clothing.

Unusual Fire or Explosion Hazard: Vapors are heavier than air and may travel along the ground and be ignited by heat, pilot lights, other flames and ignition sources at locations distant from material handling point. Flowing fuel can be ignited by self-generated static electricity.

#### REACTIVITY DATA

Stability: Stable

Hazardous Polymerization: Will not occur.

Conditions to Avoid/Incompatibility: Strong oxidizing agents, heat,

spark, flame and build-up of static electricity.
Hazardous Decomposition Products: Carbon monoxide, carbon dioxide, and
hydrocarbons.

#### HEALTH HAZARD DATA

Carcinogenicity: NTP: No IARC Monographs: No OSHA Regulated; No Occupational Exposure Limits: See COMPOSITION section.

Effects of Overexposure:

### Acute:

Eyes: May cause moderate to severe irritation, redness, tearing, or blurred vision.

Skin: Moderately irritating; May cause redness, drying of skin.

#### PRODUCT IDENTIFICATION

Trade Name: AV Jet

Date Revised: 10-15-90

Synonyms: Jet Fuel, Dual Purpose Kerosene, Jet A, Kerosene

Chemical Name: Aliphatic Hydrocarbons

'amily Description: A complex combination of hydrocarbons produced by

the distillation of crude oil, containing predominantly in the range of Co through C16.

Shipping Information: DOT Hazard Class-Combustible liquid; UN 1863.

AV-Jet MSDS

Page 3 of 5

Inhalation: May cause masal and respiratory irritation. May produce symptoms of intoxication, such as headache, dizziness, nausea, weakness, fatigue, loss of coordination and consciousness, or even death.

Ingestion: May cause gastrointestinal irritation, nausea, vomiting or diarrhea. Aspiration into the lungs may cause hemorrhaging, pulmonary edema, progressing to chemical pneumonitis, which may be fatal.

<u>Chronic</u>: Prolonged or repeated contact with the skin may cause defatting and dermatitis.

Additional Medical and Toxicological Information: May aggravate pre-existing dermatitis. Middle distillates have caused skin cancer and kidney damage in laboratory animals.

#### EMERGENCY FIRST AID PROCEDURES

Eye Contact: Immediately flush with water for at least 15 minutes, including under the eyelids. Contact a physician immediately, preferably an Opthalmologist. Speed and thoroughness in rinsing eyes are important to avoid permanent injury.

Skin Contact: Remove contaminated clothing and shoes. Wash affected areas with soap and flush with large amounts of water for 15 to 20 minutes. Launder contaminated clothing before reuse. If irritation persists, get medical attention.

Inhalation: Remove to fresh air. If breathing has stopped, apply artificial respiration. Get immediate medical attention.

Ingestion: Do not induce vomiting. If spontaneous vomiting occurs, hold the victim's head lower than hips to prevent aspiration. Get immediate medical attention.

#### SPECIAL PROTECTION INFORMATION

Eye Protection: Remove contact lenses and wear chemical safety glasses, goggles or faceshield where contact with liquid or mist may occur.

Skin Protection: Wear impervious gloves, clothing and boots when contact with skin may occur.

Inhalation: Use approved respiratory protective equipment for cleaning large spills or entry into large tanks, vessels and other confined spaces, or in any situation where airborne concentrations may exceed occupational exposure limits.

Ventilation: Provide adequate general and local exhaust ventilation:
(1) to meet occupational exposure limits, (2) to prevent
the formation of explosive atmospheres and (3) to prevent
oxygen deficient atmospheres, especially in confined spaces.

1

# SPILL OR LEAK AND DISPOSAL PROCEDURES

Spill Procedures: Remove sources of heat or ignition including internal

combustion engines and power tools. Clean-up spill

but do not flush to sewer or surface water.

Ventilate area and avoid breathing vapors or mists.

Waste Disposal:

Dispose through a licensed waste disposal company.

Follow federal, state and local regulations.

#### \* SPECIAL PRECAUTIONS AND COMMENTS

Storage Requirements: Store in tightly closed containers in a dry cool place, away from incompatible materials or sources of heat or ignition. Ground and bond all transfer and storage equipment to prevent static sparks. Empty containers may contain residue (liquid/vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death.

#### CALIFORNIA PROPOSITION 65 WARNING

Chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm may be found in crude oil and petroleum products. Although it is possible to sufficiently refine a crude oil or its end products to remove the potential for cancer, we are advising that one or more of the listed chemicals may be present in some detectable quantities. Read and follow directions and use care when handling crude oil and petroleum products.
